

We have been at the centre of our own remarkable musical planet for so long. We have taken culture from, and sent it to, every corner of the globe. Our programming of stages has gone from tiny platforms to entire fields and multi-venue festivals. Each year we produce gigs for well over 1 million people, and hundreds of bands. Our needle never leaves the coolest and most innovative of grooves.

From sold-out gigs in London's biggest venues to village halls - if we can make a vibe with our music, and there's people to enjoy it, we are happy. Over 30 Festival stages a year gives us the chance to "road-test" our bands and crucially whole new genres. We're also lucky enough to receive Arts Council England funding that allows us to explore the remix of everything! Please read on...

We invented Vintage Remix to try and make sense of the explosion of fantastic young acts dedicated to playing or producing music that takes vintage sounds and adds something 21st Century. It takes in so many micro genres, from electro swing to soul remix via electro blues and reggae remix; the list goes on... In fact anything that's an antique beat. Aside to programming hugely successful stages at some of the biggest festivals in the world, we have successfully run ground-breaking clubs in the UK including Electro Swing Club and White Mink, as well as developing a network from London to Australia via most of Europe. We have reached audiences that started as a handful of people, to millions worldwide via our social networks, events and partners labels. (Association with Freshly Squeezed Music and The Angle)
